About Synta Pharmaceuticals

Synta Pharmaceuticals Corp. is a biopharmaceutical company focused on discovering, developing, and commercializing small molecule drugs to extend and enhance the lives of patients with severe medical conditions, including cancer and chronic inflammatory diseases. Synta has a unique chemical compound library, an integrated discovery engine, and a diverse pipeline of clinical- and preclinical-stage drug candidates with distinct mechanisms of action and novel chemical structures. The company's lead drug candidate, STA-4783, is an oxidative stress inducer which recently completed a double-blind, multi-center randomized Phase 2b clinical trial in metastatic melanoma and will be entering Phase 3 development in 2007. All Synta drug candidates were discovered and developed internally. For more information, please see www.syntapharma.com. SNTA-G
